Certifications

AWS - Cloud Practitioner
Udemy - Full MERN development
HackerRank - Problem Solving
HackerRank - Python
HackerRank - SQL
HackerRank - React
Coursera - Python Data Structures
Coursera - Py' to access Web Data

Skills

- **Technical Skills**

Python, C++, JavaScript, Node.js, HTML, CSS, Bash, AWS, TypeScript, REST Api

- **Relational DBMS**

MySQL, MongoDB, PostgreSQL, OracleDb, SQLite3

- **Frameworks / Libraries**

React, Material UI, React Native, Express, Expo, Redux, Tailwind

- **Platforms**

GIT, Terminal, VSCode, Postman

- **Interpersonal Skills**

Public speaking, Adaptibility, Problem Solving, Communication skills, Time management, Leadership

- **Interests**

Coding, Learning new skills, Gaming, Fitness

Languages

- English   Full Professional Proficiency
- Hindi   Full Professional Proficiency
- Bengali   Native / Bilingual Proficiency

Software Developer Engineer

A seasoned developer with three years of experience across three prominent companies, proficient in leveraging cutting-edge technologies to design inventive solutions for complex challenges. Skilled in discovering vulnerabilities through meticulous code analysis, optimizing response times, and conducting comprehensive system evaluations for enhancement and expansion.

Education

2018 - 2022
B.Tech
SRM University, Chennai
Computer Science and Engineering with Specialisation in Cyber Security
CGPA : 9.3

2016 - 2017
XII : Kendriya Vidyalaya No. 4 , Jalandhar Cantt.
Percentage : 87.8%

2014 - 2015
X : Kendriya Vidyalaya No. 4 , Jalandhar Cantt.
CGPA : 9.2

Work Experience

Qubrid
Full Stack Developer | Fulltime
Jun'23 - Present
MERN Stack

- Spearheaded the development of Qubrid's website from inception, demonstrating proficiency in building it from the ground up.
- Developed Frontend React components to seamlessly interface with the Backend framework, adeptly diagnosing and rectifying interface software issues and debugging application code.
- Engineered APIs to integrate seamlessly with new frontend features, facilitating smooth functionality and enhancing user experience.

Brillio
Full Stack Developer | Fulltime
May '22 - Jun'23

-Verizon   React.js|Node.js|MongoDB|Express.js|Redux|Git|Postgres

- Contributed to the feature creation of a web application for Verizon using MERN and Redux, adhering to NDA requirements.

-Puma   React.js|Node.js|MongoDB|Express.js|Redux|Git|REST Api

- Integration of user-facing elements developed by front-end developers with server side logic by developing REST APIs.
- Design and implementation of low-latency, high-availability, and performant applications.
- Created Apis to work hand in hand with new features in frontend.

Cerebry
Backend Developer | Intern/Fulltime
Dec '20 - May '22
Python Stack

- Migrated the site's stack from Prolog base to Python3, Reviewing application requirements and interface designs.
- Writing Python functions to interact with the Prolog framework, Troubleshooting interface software and debugging application codes.
- Developing and implementing LaTex to support site's UI, Monitoring and improving backend performance.
